Art Unit: 2615

Applicant's amendment filed June 10, 2005 has overcome the grounds of rejection previously presented. In particular the amendment to claim 1 and Applicant's arguments have overcome the 35 USC 112, 1st paragraph rejections as well as the 35 USC 102(b) rejection of claims 1 and 3 by Miyamoto et al.

Further based on Applicant's arguments and the telephone conversation with Theodore Magee a rejoinder of claims 8-11 is being performed along with the cancellation of claims 4, 12, and 20.

Claims 1 and 17 are generic and allowable to Species III. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 8-11, directed to the species III are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. However, claims 4, 12, and 20, directed to the species of Species II remain withdrawn from consideration since they do not depend upon or otherwise include all the limitations of an allowed generic claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is

withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

For clarification of the record, Examiner notes that the rejoinder of claims 8-11 is being performed since the embodiment of Fig. 6 is a method for verifying a pre-capture process in the post-capture processing. As such, the controls of when to capture an image using a half-press and full-press of the shutter button can be used in conjunction with the embodiment of Fig. 6 simply by placing the verification routine of Fig. 6 in step 532 of Fig. 5. However, the same is not true for the red-eye correction embodiment of Fig. 4. Here a first flash and capture of image data is performed in order to determine the proper flash for the main flash and subsequently the main flash is triggered and another image is captured. If the verification result of the embodiment of Fig. 6 was used as the post-capture processing step 494 of Fig. 4 then should the comparison of step 606 fail a third flash and third image capture operation would need to be performed contrary to the teaching of the embodiment of Fig. 6 of performing the pre-capture process on all image data for the second frame of light.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Theodore Magee on June 21, 2005.

Art Unit: 2615

The application has been amended as follows:

Cancel claims 4, 12, and 20.

Claims 1-3, 5, 8-11, 15, 17-19, and 25 are herein deemed allowable over the prior art of record, the reasons for allowance are as follows:

In regards to claim 1 there is no teaching or suggestion in the prior art to perform at least one pre-capture processing function on a portion of the second set of image data to produce a test result and comparing the test result to the pre-capture result in combination with the other claim limitations.

Claims 2, 3, 5, 8-11, and 15 depend from claim 1.

The reasons for allowance of claim 17 is substantially similar to that for claim 1.

Claims 18, 19, and 25 depend from claim 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
